PROFESSIONAL SUMMARY

Frontend Developer with 5+ years of experience building production-grade, high-performance web applications in React, Next.js, and TypeScript. Proven track record leading frontend across multi-team environments — and independently architecting full products end-to-end as a sole developer. Currently building two independent production applications alongside full-time employment. Known for clean, maintainable code, strong product instincts, and a sharp eye for design detail.

PROFESSIONAL EXPERIENCE

Emergent Labs · Frontend Developer

May 2024 – Present

- Led end-to-end frontend development on two large-scale Next.js/TypeScript products, owning architecture decisions from component design through deployment.
- Partnered with designers and backend engineers to translate product requirements into polished, user-centric interfaces.
- Overhauled internal tooling and CI workflows, accelerating team feature delivery velocity by 50%.
- Established code quality standards and performance benchmarks, reducing bug rates and improving overall developer experience.
- Conducted regular code reviews and mentored junior developers, fostering consistent engineering practices across the team.

HostFi · Frontend Developer

Jul 2023 – Mar 2024

- Designed and shipped a reusable React component library, eliminating duplicated code across multiple product surfaces and substantially cutting future build effort.
- Engineered animations and micro-interactions that drove a 30% increase in measurable user engagement.
- Cut frontend load times by 30% through systematic asset optimisation, lazy loading, and targeted performance profiling.
- Collaborated with UI/UX designers to deliver pixel-perfect, fully responsive implementations across all supported viewports.

Onlypass Limited · Frontend Developer

Nov 2022 – May 2023

- Built a mission-critical internal admin dashboard from scratch, streamlining core operations and reducing team workflow time by 30%.
- Converted Figma designs into a production-ready, reusable component system, cutting feature delivery cycles by 30% and improving design-to-code fidelity.
- Refactored core site architecture for improved scalability, achieving significantly higher Lighthouse performance scores.
- Redesigned and shipped the company's public landing page, improving first-impression experience and conversion clarity.

HNG Internship · Frontend Developer Intern

Oct 2022 – Dec 2022

- Coordinated task allocation and sprint tracking for a 30-person frontend sub-team, improving delivery turnaround by 30%.
- Partnered with UX designers to implement responsive, accessible layouts, ensuring visual consistency across a complex multi-contributor codebase.
- Introduced automated PR review templates, cutting average code review cycle time by 40%.

NHub Nigeria · Frontend Developer Intern

Jul 2021 – May 2022

- Implemented responsive, mobile-first designs that contributed to a 40% uplift in mobile user engagement.

- Identified and resolved recurring UI/UX issues in collaboration with senior developers, reducing frontend defect rate by 20%.
- Participated in regular design reviews and contributed to raising the team's overall UI quality bar.

INDEPENDENT PROJECTS

Stephen Lemo · *Sole Developer*

Jan 2025 – Present

- Building a premium bespoke fashion e-commerce platform end-to-end as the sole developer — from database schema and auth through to payment and deployment.
- Engineered a layered garment customiser using React Konva with masked-multiply photo recolouring, enabling clients to personalise pieces in real time without image uploads.
- Stack: Next.js 16 (App Router), React 19, TypeScript (strict), Tailwind v4, shadcn/ui, Framer Motion, Supabase / Prisma 7.8, Auth.js v5, Paystack, Resend. Launching July 2026.

Thrive Intelligence · *Sole Developer*

2026 – Present

- Architecting and building a multi-tenant SaaS agricultural traceability platform — covering supplier onboarding, lot tracking, quality inspection, risk scoring, and transport dispatch.
- Implemented automated risk recomputation with idempotent background jobs via Trigger.dev, and a multi-layered global-reference vs per-org-config data architecture.
- Stack: Next.js 16, tRPC, Prisma 7.8, Neon Postgres, Upstash Redis, Cloudflare R2, Trigger.dev, Clerk, Tailwind v4, shadcn/ui.

TECHNICAL PROFICIENCIES

Frontend: React.js, Next.js, TypeScript, JavaScript (ES2022+), Redux, Tailwind CSS, Styled Components, shadcn/ui, HTML5, CSS3 / SASS

Tools & Workflow: Git / GitHub, Figma, VS Code, Framer Motion

Practices: Component-driven architecture, Performance optimisation, Accessibility (WCAG), Responsive design, Code review & mentorship

PORTFOLIO

- **Ownleaf** — Built core website and application functionality, delivering a responsive UI and seamless backend API integration across all key user flows.
- **Lasercards** — Enhanced site functionality and shipped core app components for improved UX, performance, and visual consistency.
- **Hostcap** — Contributed frontend development to a high-performance trading platform, focusing on data clarity and interface speed.
- **HostFi** — Rebuilt the marketing website end-to-end, delivering a significantly more responsive and engaging user experience.

EDUCATION

Federal University of Agriculture, Abeokuta

2021

Bachelor of Science, Crop Protection
